

# Universal Wax

Cera cremosa per parquet

Cleaning & Maintenance

## Universal Wax

Universal Wax is a creamy blend of beeswax and carnauba wax in de-aromatised aliphatic solvent. Ideal as a primer and finishing treatment of wooden floors and stairs, furniture and other unpainted wooden artefacts.

Easy to apply and quick drying, it allows to obtain a full, warm, satin finish effect and is easy to maintain. Universal Wax does not create a film on the surface, thus allowing the wood to breathe perfectly. Available in neutral, walnut and white versions.

### Technical data 20°C – 60 % R.H.

Appearance	Creamy paste
Density	0.850 kg/litre
Walkability	2 – 3 hours
Dilution	Green Cleaner or Diluente RMD/91
Indicative yield	40 – 60 m <sup>2</sup> /litre
Application temperature	From +5 to +35°C
Tool cleaning	Green Cleaner or Diluente RMD/91
Storage	24 months in original sealed packages
Packaging	1 litre jars

### Certifications

### Instructions for use

Sand the wood and finish it with 120 – 150 grit abrasive. Thoroughly remove dust. Apply Universal Wax using a wax spreader or a cloth, taking care to spread the product evenly on the surface without exceeding the quantity recommended. If the wood is not very absorbent, possibly dilute with Green Cleaner or Diluente RMD/91 up to 50%. After 2 – 3 hours apply a second coat, always thinly and uniformly, after 2 – 3 hours polish with a cloth or a polishing machine. In the case of previously waxed floors, a second coat is not necessary.

A floor treated with natural wax can be appreciated in all its beauty only after repeated waxing which must be carried out approximately 20 days apart from each other.

The waxing treatment can be preceded by an impregnation with Crema d'Olio hard wax oil, which allows to achieve excellent results in a relatively short time. Wait 5 – 7 days after applying Crema d'Olio before using Universal Wax.

### Maintenance

For the normal cleaning of floors treated with wax, use our Deteroil soap. Wait at least 20 days after application before carrying out any washing.

Periodically re-apply a coat of Universal Wax.

## Notes

- The whitening version of Universal Wax allows you to carry out extraordinary maintenance operations on white oiled floors, reviving the colour.
- Do not exceed the quantity of product.
- Ventilate the room during application.

## Safety standards

PRODUCT FOR PROFESSIONAL USE. Strictly comply with the labelling and consult the safety data sheet before using the product.

## Disposal

Dispose of unused product and empty packaging in accordance with local legislation.
