# TOVER WALKING THE WALK.

Our Competitors often "talk the talk" on green but at Tover we have been proudly walking the walk by powering our manufacturing machines with renewable energy sources since 2010. All of this is important yes, but it is not as important as the most important person in our business. You.

We listen to you, take on board your suggestions and only then do we formulate products in our labs that help you to work better, stronger and faster, making your working day just that little bit less stressful. All of this to ultimately improve your bottom line and getting you smiling come your financial year end. We do this by giving you unrivalled performance MS Polymers, zero solvent-based systems of adhesives and oils, and truly ground breaking self linking lacquers that are free from Isocyanates, and outperform any other product that it is possible to buy today.

Tover. We've got your back.

## Engaged in the challenge of climate changes

We have chosen to support Plant for the Planet, an international organization promoting the reforestation of the planet and the sensitization of the youngest towards environmental issues. Trees are a precious tool for capturing CO2 and combating global warming: the goal is to plant as many trees as possible, for everyone's sake. An ambitious challenge, in which we are proud to participate together with our customers.

## Certifications

Quality certifications, transparency guarantees

### Rockfloor F10

#### Fiber-reinforced self-leveling compound

Rockoor F10 enables leveling up to 10 mm thick even on irregular concrete sub-floors before the installation of wooden flooring. It is also suitable on deformable screeds before the installation of resilient floors coverings.

### Primer C4

#### Water-based adhesion promoter for self-leveling compounds

Ready-to-use one-part primer to promote the anchorage of leveling compounds on any type of sub-floor. It can be used also to promote adhesion between 2 leveling compound coats.

### Primer PU100

#### One-part polyurethane DPM primer | Quick-drying

Fast drying polyurethane resin-based primer, solvent-free and odourless. It can be used as a water-proofing DPM (up to 5% R.H.) and consolidating primer agent or to obtain synthetic mortars if mixed with sand. Suitable also for use on underfloor heating systems.

### Adeblok T19

#### Two-part epoxy primer Solvent-free

Solvent-free two-part epoxy primer, odourless. It can be used as water-proofing DPM (up to 5% R.H.) and consolidating agent on any absorbent and non-absorbent sub-floors including ceramics tiles. If mixed with sand, it enables to make thick repairs on the sub-floor.

### Primer TS

#### One-part water-based consolidating primer

One-part water-based primer for surface and deep consolidating of dusty, poor or damaged concrete sub-floors. Once dry, it allows bonding with any type of adhesive.

### Nano-Fix

#### Water-based surface consolidating primer

Fast drying one-part primer in water dispersion formulated with resins composed of nanometric particles. Anti-dust, it has a consolidating action on the surface of absorbent substrates like concrete, gypsum, anhydride. It enables bonding with any type of adhesive.

### Idroblok C3

#### Three-part water-proofing primer for non-absorbent sub-floors

Epoxy solvent-free three-part primer, it perfectly bonds even on very smooth surfaces like ceramics, sandstone, marble etc. Thus it can be used to water-proof non-absorbent sub-floors promoting the glue adhesion. Recommended for areas with humidity raising.

### Idroblok 2K

#### Two-part water-based epoxy primer Solvent free

It can consolidate and waterproof sub-floors with high residual humidity (up to RH 5%). Odourless, solvent-free, dilutable with water. Suitable for isolating residues of old adhesives.

### LVT Leveller

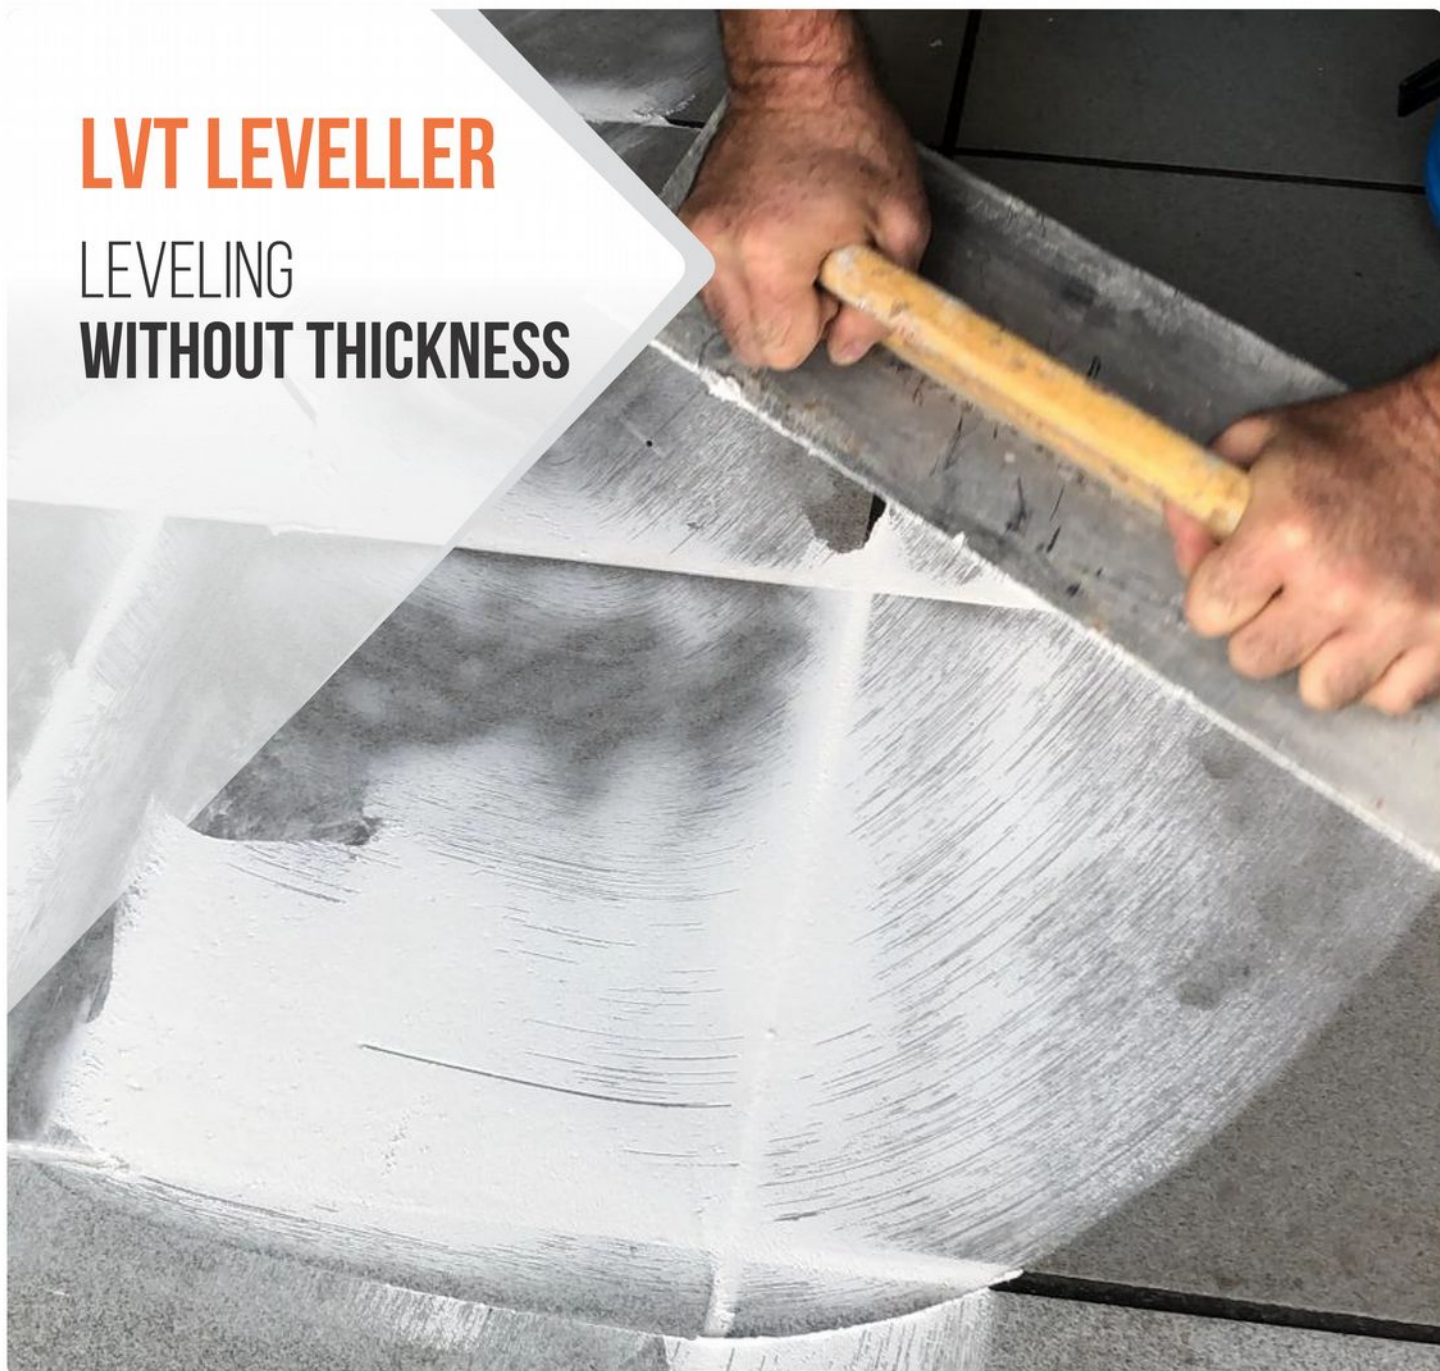

#### Ready-to-use grout smoother for LVT

Ready-to-use grout smoother to be applied before laying a bonded or floating LVT or SPC. Easy to sand, it allows leveling (up to 2 mm) without creating thickness and sanding is possible after just 2 hours.

## LVT LEVELLER

LEVELING  
WITHOUT THICKNESS

# ADHESIVES

## Tovcol LVT Fibre<sup>+</sup>

**One-part LVT fibre-reinforced acrylic adhesive**

Tovcol LVT Fibre+ is the fibre-reinforced acrylic-based solvent-free adhesive, no waiting time, suitable for LVT flooring on any type of absorbent subfloors, with quick and strong initial tack, an excellent adhesion and a perfect dimensional stability.

## Tovcol RP

**One-part acrylic adhesive for any type of resilient coverings**

Solvent-free acrylic glue for bonding indoor resilient coverings on absorbent surfaces. Universal, it is suitable for PVC and vinyl, rubber, cork and textiles.

## Tovcol MS LVT

**One-part silane-modified adhesive for LVT MS Polymer**

One-part MS adhesive for LVT, SPC, PVC, rubber and linoleum. Suitable for laying on any kind of subfloor. It is particularly resistant to dampness, water, heat, static and dynamic loads. It is perfect for commercial and industrial environments, and secure for the user as isocyanate and solvent-free.

## Tovcol MS LVT Wall

**One-part MS Polymer adhesive for LVT on walls**

One-part MS adhesive for LVT and SPC installation on walls, it doesn't leak and prevents the covering to slip down. It is suitable on both absorbent and non-absorbent surfaces and can be used to apply every kind of resilient and textile covering. Particularly resistant to humidity, water and heat, it is suitable for commercial and industrial environments.

## Tovcol MPL

**One-part acrylic adhesive for any type of resilient coverings**

Solvent-free high-sticky acrylic glue for bonding indoor resilient coverings on absorbent surfaces. Universal, it is suitable for PVC and vinyl, rubber, cork and textiles.

## Tovcol TST

**One-part pressure sensitive acrylic adhesive for resilient coverings**

Solvent-free acrylic glue for bonding indoor resilient coverings like textiles, PVC, linoleum on absorbent and non-absorbent surfaces also in vertical position. Thanks to the permanent tack of the adhesive, the flooring can be removed without any damage.

## Tovstick E66

**One-part neoprene adhesive for PVC and plastic flooring**

Neoprene double buttering adhesive for bonding indoor PVC and plastic flooring on both absorbent and non-absorbent sub-floors. The glue has an immediate set.

## Tovcol T91

**Two-part epoxy-polyurethane adhesive**

Two-part epoxy-polyurethane adhesive for bonding resilient floors like PVC, rubber, linoleum and textiles both indoor and outdoor on absorbent and non-absorbent sub-floors. Light brown, red, black and green colours. It can be applied in vertical position, too. Suitable for padel courts.

## Tovcol PU2K

**Two-part polyurethane adhesive for resilient flooring**

Two-part polyurethane adhesive, water and solvent-free, for indoor and outdoor installation of rubber, LVT and PVC flooring. Twin Pack System.

## Tovcol PU2K Green

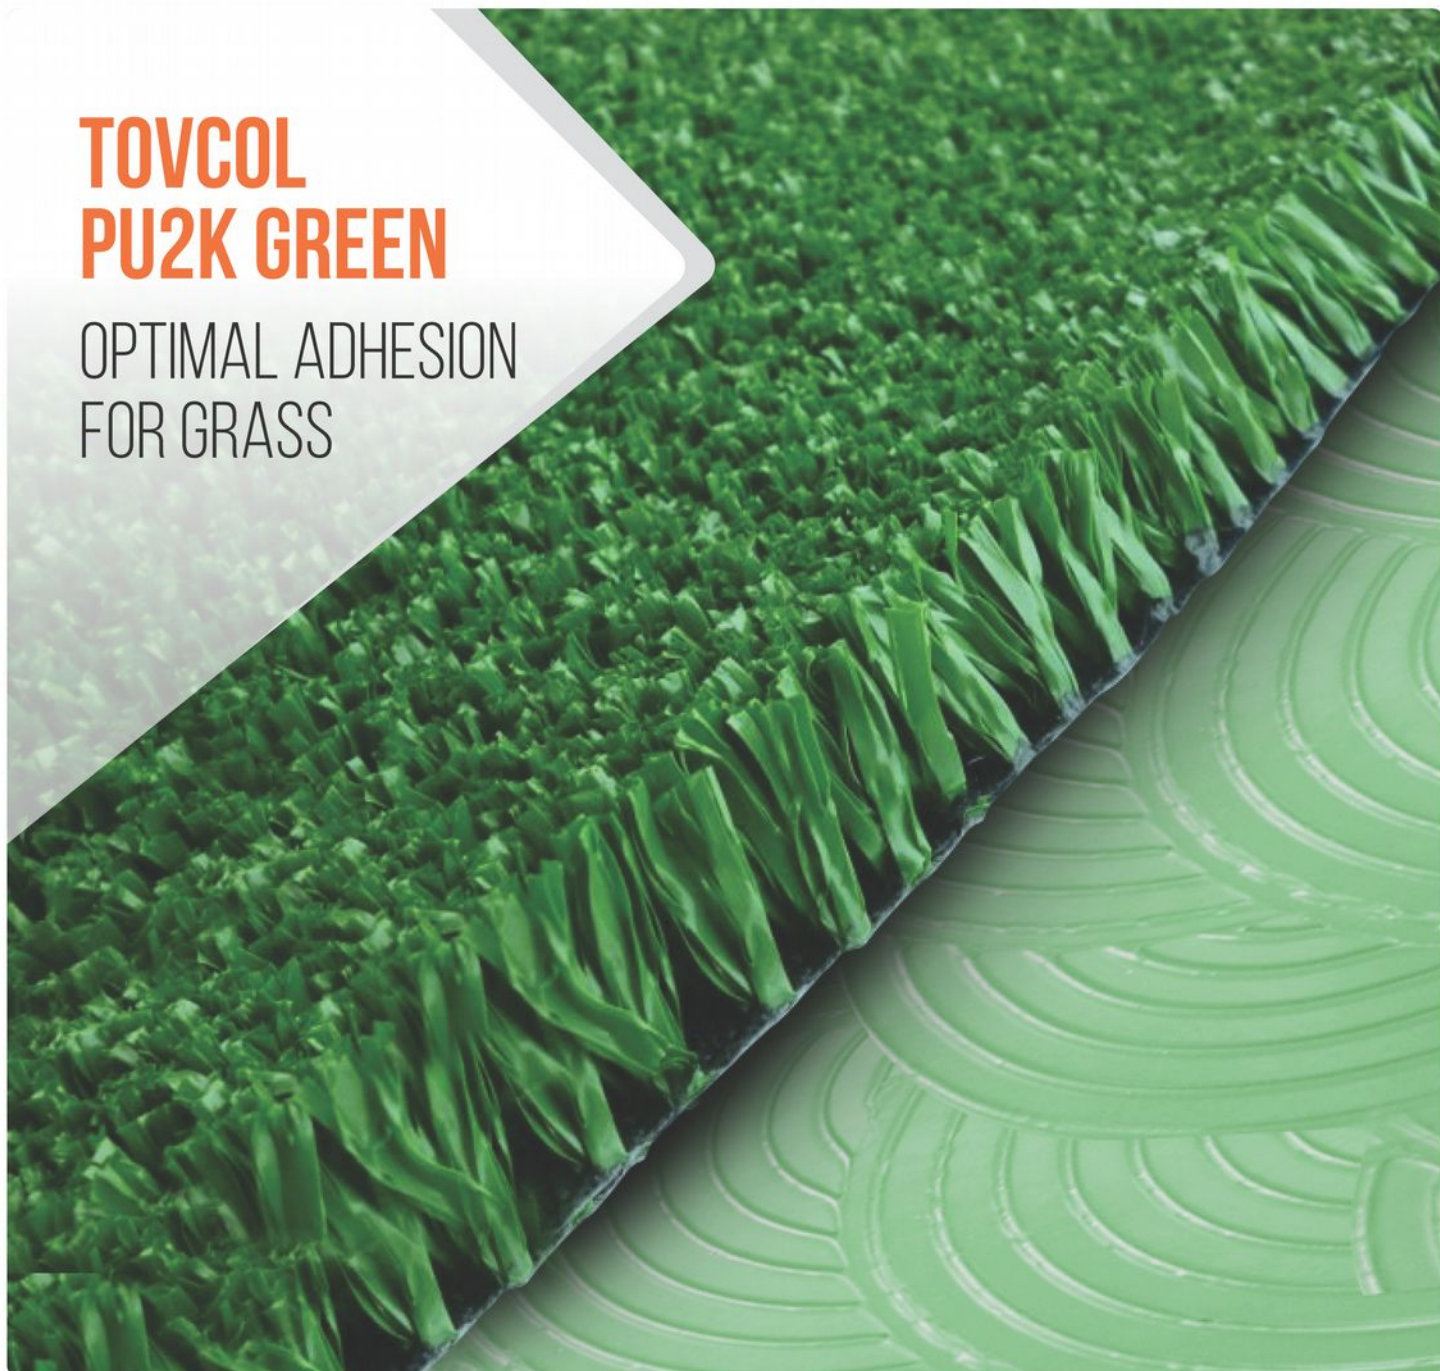

Two-part polyurethane adhesive for turf

Two-part solvent-free polyurethane adhesive for bonding of PVC and synthetic grass both indoor and outdoor on absorbent and non-absorbent sub-floors. Available green. Twin Pack System.

OPTIMAL ADHESION  
FOR GRASS

## CLEANING AND MAINTENANCE

### **Mymfloor Cleaner**

**High-concentrated cleanser for flooring**

Neutral high-concentrated cleanser for the frequent cleaning of any surface. Thanks to its excellent degreasing properties, it gets very good results even on high-traffic areas and can clean greasy dirt effectively.

### **Nettardue**

**Concentrated cleanser to remove intense dirt**

Concentrated degreasing and de-waxing cleanser. It removes previous layers of metallized waxes from vinyl flooring, PVC, rubber and linoleum.

## Cleaning and maintenance

### Ready Pro

#### Antistatic natural cleanser for laminate floors

Antistatic natural cleanser for laminate floors. Thanks to the spray, the strictly necessary quantity of product is used. Once dry it is streak-free.

### Make-up

#### Regenerating product for laminate, LVT, vinyl and resins floors

Make-up refreshes scratched and dull laminate floorings and brings them back to their initial beauty. Applied on new floors, it enhances the colour and creates a protective water-proof film on the surface, resistant to abrasion. It protects the floor and improves appearance. Gloss scale: Matt, Glossy.

### Resinal Wax

#### High resistance protective wax

Self-polishing wax suitable to restore scratched and worn floors. Recommended for the maintenance of LVT, SPC, linoleum and PVC. It creates on the surface a water-proof washable film, resistant to alcohol and wear.
