

# Green Cleaner

## Slow evaporation odourless aliphatic thinner

Bravo is a one-part water-based sealer for on-site lacquering of wood floors. Suitable for the main wood species commonly used on the market, its special formulation allows for the first coat application while minimizing the risk of overlaps. The product is easy to sand and can be overcoated with all Tover water-based lacquers. It is also suitable for exotic woods commonly used in wood floors installation.

Available in 1 litre bottles and 10 liters drums.

### How to use

**For dilution** – Follow the directions provided in the technical data sheets of the individual products. Green Cleaner can be used as a substitute for conventional solvents such as mineral spirits or turpentine.

**For removing oils or waxes** – To remove residues of old oil or wax-based treatments from wood, or to eliminate excess oil with poor drying, proceed as follows:

Apply Green Cleaner with a cloth or roller on the surface to be treated, after 5–10 minutes, remove the old treatment using a single-disc machine equipped with a green pad. Remove all residues using a clean cloth. For restoration, it is recommended to proceed with an impregnation treatment (oil or wax).

### Notes

- Do not use Green Cleaner with water-based products.
- Always check compatibility with the product to be diluted.
- Green Cleaner can be used for cleaning tools and machinery used for applying oil, wax, or oil-based lacquers.

### Safety regulations

Product for professional use. Strictly follow the label instructions and consult the safety data sheet before use.

### Disposal

Dispose of unused product and empty drums in accordance with local regulations in force.

**ADDITIVES &  
THINNERS**

The recommendations in this technical bulletin are for guidance only and do not imply any responsibility on our part, as the methods and conditions of use of the product are beyond our control. We recommend verifying the actual suitability for the intended use.
